Professional Summary

Data-driven B.Tech final-year Data Science student with hands-on experience in machine learning, deep learning, and intelligent automation. Skilled in Python, SQL, Excel, data cleaning, and data visualization, with practical exposure to building AI agents and automation workflows using tools like n8n, Zapier, and related platforms. Experienced in solving real-world problems through data-driven solutions and eager to contribute to impactful data science and AI projects through internships

Education

B.K. Birla Institute of Engineering & Technology, Pilani, Rajasthan

2022–Present Bachelor of Technology in Data Science

Relevant Coursework: Machine Learning, Deep Learning, Python Programming

CGPA: 7.5/10

Paramhans Career Point, Chirawa, Rajasthan

2021

Senior Secondary Education (12th Grade), RBSE Board

Grade: 95.20%

Skills

- **Technical Skills:** Data Science, Machine Learning, Deep Learning, Agentic AI Systems, Workflow Automation,
- **Programming & Tools:** Python(Pandas, Scikit-learn, Matplotlib), SQL, n8n, Zapier, Chatbase, Voiceflow, Vapi
- **Soft Skills:** Problem-Solving, Prompt Writing, Team Collaboration, Communication, Remote Work Adaptability, Self-Learning.

Certifications

- Data Analytics Using Python, IBM ([view certificate](#)) July 2024
- Machine Learning, Internshala ([view certificate](#)) July 2024
- Data Analysis with Python, Cognitive Class [View Certificate](#)

Projects

Credit Card Classification Model

2024

Developed a machine learning model to classify credit scores into Good, Average, or Bad categories using customer financial data. Achieved 85% accuracy through feature engineering and model optimization.

Technologies: Python, Scikit-learn, Pandas, NumPy

Dataset: Kaggle

Key Tasks: Data preprocessing, exploratory data analysis, model training, hyperparameter tuning

Movie Recommendation System

2024

Built a content-based recommendation system to suggest movies based on user-input keywords. Improved user experience by implementing cosine similarity for content matching.

Technologies: Python, Pandas, Scikit-learn

Dataset: Kaggle

Key Tasks: Data cleaning, text processing, vectorization, recommendation algorithm development

2. Personalized Email Outreach Agent

Description:

Developed a no-code AI agent that fetches company context via website, and generates personalized emails using OpenAI. Emails are auto-saved to Gmail drafts on every new row insertion.

Tools Used:

Zapier · OpenAI API · Google Sheets · Gmail API · Web Scraping · Trigger Nodes

Outcome:

Enabled scalable, human-like email outreach for jobs and partnerships, eliminating repetitive writing effort and increasing engagement potential.

Professional Experience & Activities**Agentic Ai Internship, clusterx (vision ai), Jaipur**

- participated in real-time AI and Data Science projects, supported research and development activities
- August 2025
